

Digital printing is a versatile and contemporary medium which allows us to print high resolution designs onto a wide variety of vinyls, solid substrates such as aluminium, di-bond, plastic, foam and acrylic together with canvas, backlit material for exhibition stands, banners, mesh wraps and paper. Using Pantone colour references we can accurately reproduce corporate logos, military insignia, artistic impressions and photographs.

AFFORDABLE - Digital print is fast and cost effective, making it the ideal choice for the 'new development' advertising campaigns.

DISPLAY - We don't just make signs. Our digital studio can produce artworks for your special events or exhibitions.

Here is a factor to think about when choosing your customised Digital signs and artwork:

- **How long should your display last?** By adding a protective overlay film you can prolong the life of your graphics. P.O.F. can protect from scuffs and accidental damage and provide resistance to the sign face from UV light.

STORYBOARDS - Create a story using sequential images along corridors and walkways

INFORMATION - Digital print is ideal for maps and plans.

STRIKING - Increase visibility by incorporating illumination.

BRANDING - A graphic vinyl wrap can reinforce your brand.

Customers say...

"Stocksigns have been great at working in partnership with us... After the design has been approved, they will print and apply tough anti-graffiti vinyl wrap to the main panel of our kiosks. The vinyl wrap service is very popular with our customers as it can be up- dated when required so that the kiosk could be used for a different campaign or function. Stocksigns also apply silk screen logos to the upper panels for branding. We're really pleased with the results."

DS - SABRE vision

IMPACT - The repeat use of these digitally produced illuminated signs add 'drama' to a campaign.

DEVELOPMENTS - Inform the public while protecting your site with combined use of artist impression boards with hoardings.

ENHANCE - Digital graphics with backlit illumination will add life to your graphics.

FUN - Digital print can be used to create a friendlier appeal even to your wayfinding signs.

PROMOTION - Innovation in display products have made banners affordable for even the smallest of business.

Our staff say...

"The beauty of digitally produced graphics is its flexibility. Technology today means that graphics can be applied to almost any surface."
